

In keeping with our tradition of providing you with great products and ongoing customer service, we have corrected some minor issues with Jewelry Designer Manager Pro and highly recommend that you download and install the JDM Pro 3.19 version.

THIS UPDATE IS FOR USERS WHO HAVE JDM Pro. Please check the Version and date of your program on the bottom left of the main menu. Updates are free for one year from purchase or with a current [Annual Maintenance](#) agreement. For more information please visit the website Support page.

Please Note: Please locate your CD key before you install the update. It is located on your jewel case or on the order confirmation if you ordered a download.

INSTRUCTIONS

Please make a backup of your files before you begin. If for some reason you don't like the update this will allow you to go back to the previous version. Use Jewelry Designer Manager or Windows Explorer to back up or rename the files. (If you are unfamiliar with Explorer and need help, please give us a call. We will be happy to help you over the phone.) The two files you need to back up are: JDMDData.mdb and JDM.mde. JDMDData.mdb contains all your data and is the most important file. JDM.mde is the program in case you want to revert back.

1. **Make sure you have a backup as explained above.**
2. Start the Download of JDM Pro Version 3.19 Update from the website.
3. In the Download dialog box choose "Save" and save the file **JDMPro319Update20100727Setup.exe** to a folder on your computer and run it from there.
4. The Setup program will install the file to the appropriate location. When it is finished start Jewelry Designer Manager from the icon on the desktop. You should see Version 3.19 date 07/27/2010 on the bottom left of the Main Menu.

List of Changes/Fixes:

Version 3.19 7/27/2010

1. Fixed BOM Jewelry Assembly reports.

info@jewelrydesignermanager.com

Version 3.15 07/30/2007

1. Compatible with Windows Vista.
2. Added User Guide to Menu

Version 3.14 12/15/06

1. Removed sort on Item# in Jewelry Assembly screen.

Version 3.14 09/06/06

1. Jewelry Piece Assembly Full Page Report: fixed currency symbol on wholesale, direct and retail prices.
2. Customer Mailing Labels – Sort by Zip Code.

Version 3.14 03/30/06

1. Support for international currency. Program uses currency symbol set by the Windows operating system.

Version 3.13

1. Jewelry Piece Quicklist: Item # wider.
2. Jewelry Price List: Item# wider.
3. Invoice: Sorting of items removed; same order as entered.
4. Jewelry Piece Catalog 4pp: Company address added.
5. Jewelry Parts: Qty = 2 decimal places.
6. Bom Assembly Report: grouping by PieceID fixed.
7. Part Reorder by Category Report: sorting fixed.

Version 3.12

1. Sales by Piece Summary Gross Profit: Item # wider.
2. Sales Tax: 3 decimal places.
3. Jewelry Parts screen: Sort order removed.

Version 3.11

1. Fixes Jewelry Catalog Reports: 4 & 6 Pieces/Page. Some pictures were getting cut off.
2. Jewelry Piece Labels Report: added Toolbar to export labels.
3. Sales By Customer Gross Profit Report: fixed sorting/grouping.
4. Invoice: Invoice date is set to today's date by default when adding a new record.
5. Sales Reports: If totals are not matching run Compact and Repair on Maintenance menu. This will make sure that all Invoice dates match in sales tables.

Version 3.10

1. Fixes issue on older PC's not have up-to-date active active controls and dlls.

Version 3.09

1. Update installs Active X control and mscomctl.dll if not already there (replaces older versions only)

Version 3.08

1. Sales by Customer Detail and Sales Invoice Detail reports grouping corrected. (Reports were grouping by customer last name instead of Customer ID previously)

2. Jewelry Pricing/Assembly: When parts are removed for a piece the piece is added to finished piece inventory.
3. Jewelry Parts: Date Purchased field automatically defaults to today's date.
4. Invoice: Date and Invoice Number aligned at top. PO# and terms moved to bottom.
5. Report: Jewelry Price List: Category label larger.
6. Report: Sales by Customer Gross Profit - margins adjusted.
7. Report: Jewelry Catalog 4pp - margins adjusted.
8. Report: Part Labels - bottom margin adjusted.
9. Report: Part Purchase History summing by category not running sum.
10. Report: Sales Invoice Detail - Item # wider.
11. Invoice: Purchase date defaulted to today's date rather than the Invoice date. Changed to be the same as the Invoice date.

Version 3.07

1. Report Sales by Customer Summary fixed. Was not printing sales from Standard Version. (only applies to users who upgraded from Standard).

Version 3.06

1. Report: "Part Reorder List by Vendor" in the Bills of Material screen was not printing the Vendor order #. Fixed.
2. Report: Customer Mailing Labels 5160 were not printing 2nd address line. Fixed.
3. Report: Jewelry Piece Labels: Export option added to menu bar.
4. Reports: Jewelry Piece and Jewelry Parts Quicklists: Export option added to menu bar.
5. Pro Upgrade only: Jewelry Parts fields [Show] and [Additional Order Info] were not transferring over to Pro. Fixed.

Version 3.05

1. Jewelry Part screen: There is a new Part Price Option Group that allows users to see which option they picked on the "Set Program Defaults" screen and change it on the part record. If users had selected "Specify" they can enter the part price they wish to use.
2. Jewelry Part screen: Copy command copies all purchase information also.
3. Part Quicklist screen: Description column can be sorted.
4. Part Quicklist Report: Description column added.
5. Part Price List reports: Added Description.
6. Jewelry Catalog reports added: 4 pieces per page and 6 pieces per page.
7. Jewelry Catalog reports: removed grouping by category.
8. Part Inventory Report - Discontinued parts don't print
9. Jewelry Assembly 4x6 Report: Margins changed.
10. New Report: Part Purchase History which prints all parts purchased. User can select dates.
11. Jewelry Catalog and Labels: Jewelry Piece Size added.

Version 3.04 10/21/03

1. Terms added to Invoice.
2. Message on Invoice now displaying properly.
3. Invoice Quicklist can be printed.
4. Jewelry Piece Quicklist remains open after opening Jewelry Assembly screen.
5. Jewelry Parts and Jewelry Piece Categories can be printed.
6. Report: Jewelry Piece labels fixed. (weren't lining up properly)

Version 3.03

1. The field: {Date Parts Removed from Inventory} was added back to the Jewelry Assembly screen.
2. Report: Jewelry Piece Parts List grouping fixed. (Was grouping by name instead of by Jewelry PieceID.)
3. Invoice: The [Sold To:] drop-down box allows you to select customer by typing first letter of last name.
4. Quicklists: You can now print the Jewelry Piece and Jewelry Parts Quicklist directly from the screen as sorted/filtered.
5. Sales Invoice Detail and Sales by Customer Report fixed. Were not grouping correctly.

Version 3.02 09/06/03

1. The default for new Jewelry Pieces is to show them in the catalog. The "Show in Catalog check box" is automatically checked so that the piece appears on all the reports.
2. The Part Inventory reports were listing the same part for each time it was purchased instead of once. This has been corrected.
3. A comment field has been added to the Jewelry Piece item on the invoice and added to the Customer Sales screen. Users of JDM Standard version who upgraded will see their original comments for previous sales.
4. Vendors cannot be deleted if there are parts purchased from the vendor. A Jewelry Piece cannot be deleted if there are Jewelry Pieces listed in any Bills of Material.
5. New Bills of Material report: BOM Total Costs.
6. Filtering/Sorting in Jewelry Assembly screen was locking up program on Windows 2000/98 machines. The Date Removed from Inventory field was removed to prevent this from happening.
