

In keeping with our tradition of providing you with great products and ongoing customer service, we have corrected some minor issues with **Jewelry Designer Manager Deluxe** and highly recommend that you install the latest version.

INSTRUCTIONS

This update is for JDM Deluxe. Please check the Version and date of your program on the bottom left of the main menu. Updates are free for one year from purchase or with a current [Annual Maintenance](#) agreement.

Please Note: Please locate your CD key before you install the update. It is located on your jewel case or on the order confirmation if you ordered a download.

Please make a backup of your files before you begin. If for some reason you don't like the update backing up will allow you to go back to the previous version.

Use Jewelry Designer Manager or Windows Explorer to back up or rename the files. (If you are unfamiliar with Windows Explorer and need help, please give us a call. We will be happy to help you over the phone.) If you are backing up to a CD please use your CD software to write the files to a CD. The two files you need to back up are: JDMData.mdb and JDM.mde. **JDMData.mdb contains all your data** and is the most important file. **JDM.mde** is the program file in case you want to revert back to your previous version.

INSTALLATION

1. Make sure you have a backup as explained above.
2. Start the Download of JDM Version 4.12 Update from the website.
3. In the Download dialog box choose "Save" and save the file to your desktop. When the download finishes run the **JDMDeluxe412Update20100727Setup.exe** to start the installation.

The Setup program will install the file to the appropriate location. When it is finished start Jewelry Designer Manager from the icon on the desktop. You should see Version 4.12 dated 7/27/2010 on the Main Menu.

List of Changes/Fixes:

Version 4.12 7/27/2010

1. Tax field on Invoice 4 decimals.

6. Message field on Invoice and Memo can be much larger

Version 4.11 11/08/2009

1. Security Upgraded
2. Jewelry Assembly Labor Tab: Edit Worker command button fixed.
3. Memo and Invoice: message field larger.

Version 4.11 02/10/2009

1. **Jewelry Assembly Pricing:** The program gives users the option to use the Suggested selling price or to Specify the jewelry piece price. The Suggested price automatically recalculates when the total cost of materials changes, i.e. when metal prices go up each piece that uses the metal will have a price increase. If the Specify price option is selected then the user must change the prices manually by entering the prices in the text boxes. This option can be different for each jewelry piece.
2. **Jewelry Piece Labor:** Labor can be itemized for each jewelry piece. Each labor item includes an hourly rate, description, laborer and notes. Total labor cost is automatically calculated.
3. **Report PDF:** All reports can be converted to PDF format from the Print Menu. (user does not need to have Adobe Acrobat installed). User can save and email PDF reports to customers.
4. **Sell Parts:** Parts can be used as components and/or sold separately. User can add a part and its inventory to a new jewelry piece to allow for reselling parts and ready-made jewelry items.
5. **Jewelry Parts Quicklist:** New list shows all Jewelry Pieces that contain the Part selected in the Quicklist.
6. **Jewelry Piece Quicklist:** New list shows all customers who have purchased the Jewelry Piece selected in the Quicklist.
7. **Jewelry Piece Labels:** Can be exported from Print Preview.
8. **International currencies** supported. Program uses currency symbol set by Windows Regional and Language Options/Current Format setting.
9. **Screens resized for high resolution.**
10. **Footer Wider on reports.**
11. **Avery 5160 labels: last row printing.**
12. **Linking back end fixed.**
13. **Logo file resized on reports.**
14. **Find Jewelry Piece – Sort order fixed.**

Let us know if you have any suggestions for improvements or comments.

Thank you!
